

HAIDAR LABIB IZZAKIF, S.KOM

Data Analyst | Data Science | Data Analytics

Bekasi, Indonesia | izzakief280@gmail.com | +6285695791713

[linkedin.com/in/haidar-labib-izzakif](https://www.linkedin.com/in/haidar-labib-izzakif) | haidarlabibizzakif.my.id

Summary

Data Science graduate with hands-on experience in data analysis, data processing, data validation, statistical analysis, machine learning, and business-oriented analytics. Experienced in working with transaction and participant data, including data cleaning, preprocessing, exploratory data analysis (EDA), feature engineering, statistical modeling, regression analysis, forecasting, and data-driven recommendations. Proficient in Python, SQL, Microsoft Excel, Power BI, Pandas, NumPy, Scikit-learn, Statsmodels, and KNIME, with project experience analyzing 21,567+ transaction records and developing demand analysis and forecasting models. Detail-oriented and analytical with strong problem-solving, communication, and teamwork skills.

Technical Skills

Data Analytics:

Data Analysis, Data Processing, Data Cleaning, Data Validation, Data Entry, Data Organization, Exploratory Data Analysis (EDA), Statistical Analysis, Data Reporting, Data Visualization

Programming & Data Science:

Python, SQL, Pandas, NumPy, Scikit-learn, Statsmodels, Machine Learning, Classification, Regression Analysis, Feature Engineering, Forecasting, Deep Learning, Association Rule Mining

Business Intelligence & Analytics Tools:

Microsoft Excel, Power BI, KNIME

Database & Development:

MySQL, SQLite, PHP, Flask, API Integration

Tools & Version Control:

Git, GitHub

Professional Skills:

Analytical Thinking, Attention to Detail, Problem Solving, Communication, Teamwork

Project Experiences

Price Elasticity & Demand Analysis – Toko Virend

March 2026 - July 2026

Python | Pandas | NumPy | Forecasting | Regression Analysis | PHP | Railway

- Analyzed 6,203 cleaned sales transactions across five diaper product categories to examine the relationship between price and demand.
- Performed data cleaning, data preprocessing, feature construction, and statistical analysis to prepare sales data for analytical modeling.
- Developed Log-Log Regression models to estimate price elasticity and Semi-Log Regression models for demand forecasting, evaluated using statistical tests and MAE, RMSE, and MAPE.
- Simulated 5%, 10%, and 15% price increases to estimate changes in demand, revenue, and profit for pricing decision support.
- Deployed the analytical models as a web-based application using a Python backend/API hosted on Railway and a PHP frontend for interactive analysis and simulation.

Customer Purchase Behavior Analysis – Nurul Fikri Academy

February 2025 - June 2025

KNIME | Data Preprocessing | Association Rule Mining

- Analyzed 21,567+ transaction records to identify customer purchasing patterns and product associations.
- Performed data preprocessing and data transformation to prepare transaction data for association rule analysis.
- Built an end-to-end Association Rule Mining workflow using support, confidence, and lift to identify meaningful product relationships.
- Generated 9 promotional bundle and 12 bonus-item recommendations from seasonal, daily, and time-based purchasing patterns.

- Translated analytical insights into data-driven promotional strategies for targeted customer engagement.
- Collaborated with team members to develop the data analysis workflow, document findings, and present data-driven recommendations based on customer purchasing patterns.

Work Experiences

BPJS Ketenagakerjaan – *Bekasi, Indonesia*

February 2025 - May 2025

Administration Intern

- Responsible for processing registration and cancellation of BPJS Ketenagakerjaan membership under special programs, handling 100+ participants daily.
- Conducted accurate data entry, verification, and correction to ensure information accuracy.
- Managed and organized participant information to support administrative and data management processes.
- Handled billing reminders for individuals and companies enrolled in special programs.
- Supported administrative operations requiring attention to detail, data accuracy, record management, and timely processing.

Pondok Pesantren Ar-Ridho Sentul – *Bogor, Indonesia*

May 2020 - July 2021

Teacher - Teaching Program

- Delivered structured instruction on fundamental computer literacy and Microsoft Office applications through practical, hands-on learning sessions designed to improve students' digital proficiency.
- Provided comprehensive training in Microsoft Excel, including data entry management, cell formatting, sorting and filtering techniques, and the application of essential formulas such as SUM, AVERAGE, COUNT, and IF to support basic data analysis.
- Facilitated student learning by integrating computer based tasks with soft skills development, including communication, teamwork, and problem-solving abilities in classroom activities.

Education

Bhayangkara Jakarta Raya University

Bekasi, Indonesia

Bachelor of Data Science

September 2022 - August 2026

GPA: 3.61 / 4.00

Core Areas

Data Analytics • Data Science • Statistical Analysis • Machine Learning • Regression Analysis • Forecasting • Business Analytics • Data Visualization • Data Cleaning • Data Preprocessing • Feature Engineering • Data Management • Predictive Analytics
